

# Adobe® Captivate® 5.5 software

Go beyond presentations and create interactive eLearning content without programming

**Transform presentations into eLearning content**—Using a roundtrip Microsoft PowerPoint workflow, easily transform presentations into interactive eLearning content deliverable virtually anywhere. Accelerate development with an intuitive user interface, powerful timesaving features, and convenient out of the box functionalities.

**Engage learners with interactivity and multimedia**—Make your eLearning experiences as compelling as those in the real world, with application simulations, branching scenarios, “show me” movies, and “try it” demos. Add voice-over, videos, graphics, and animations to stimulate learning.

**Assess learner performance**—Embed a wide variety of interactive “test me” quizzes in your content and publish to multiple devices and leading SCORM- and AICC-compliant Learning Management Systems (LMSs). Use the new single-click workflow to publish directly to YouTube. Track and report key performance metrics.

## Top new features of Adobe Captivate 5.5 software

- Gradients, shadows, and rotation
- Attractive quizzing out of the box
- Publishing to tablets, smartphones, and iOS devices
- Single-click publishing to YouTube
- Multivideo support and synchronization
- Direct access to Adobe resources

## Top reasons to buy Adobe Captivate 5.5 software

**Roundtrip PowerPoint workflow**—Leverage existing Microsoft PowerPoint slides in your projects.

**Optimized user interface**—Get going faster, do the job in fewer steps, and improve the overall authoring experience with the Property inspector, the multiple document interface, and personalized workspaces.

**Master Slides and Object Styles**—Use Master Slides and Object Styles for quick and consistent formatting across a project.

**Automatic screen capture with smart full-motion recording**—Automatically record all your actions while using any software application.

**Scenario branching**—Collapse and expand sections of a simulation, and create complex scenarios by automatically branching at the end of slides, based on a learner’s choice at the beginning of the simulation.

**Multivideo support and synchronization**—Import video in a wide variety of formats and synchronize it with the project, slide, or set of slides.

**Text-to-speech functionality**—Use automatic voice-over functionality to turn text into high-quality speech in a few clicks and update the audio when required.

**Attractive quizzing out of the box**—Create eye-catching quizzes with new out-of-the-box quiz templates and an attractive set of components.

**Multiformat publishing**—Publish your projects in multiple formats (MP4, SWF, EXE, PDF) to the web, desktops, notebooks, tablets, smartphones, iOS devices, and leading SCORM- and AICC-compliant LMSs.

**SCORM/AICC compliance (LMS integration)**—Export scoring data in a SCORM- and AICC-compliant format for use with a Learning Management System.
